

# READ THIS! BEFORE YOUR EQUIPMENT NEEDS REPAIR

Industries cannot afford downtime of their equipment and machines. It can be costly and frustrating to repair. Using an industrial monitoring relay to notify operators that there is an issue can be a lifesaver to the organization.

## HOW TO CHOOSE A COMPANY FOR YOUR RELAY SOLUTION:

**AVAILABILITY:** It is important to work with a company that boasts short lead-times, but can also locate a product or replacement product for you when you need it. A company that can quickly determine your nearest distributor is imperative to your success.

**DEPENDABILITY:** Your relay should be tested before it is shipped to you so that you know your relay will do the job it is intended to do. Knowing that your relay is the most innovative and reliable relay on the market gives you the peace of mind that you are controlling electrical processes or protecting your equipment from damaging fault conditions accurately.

**COMMUNICATION:** You should be able to contact a live person when you call the company to have questions answered when they arise. A responsive, knowledgeable technical support team that knows how to select the correct product or answer questions on features and options can save a lot of frustration and trial and error.

## LET MACROMATIC EARN YOUR TRUST:

**WHAT WE DO:** Macromatic manufactures and engineers industrial relays and controls. To stay ahead of the competition, Macromatic develops and redesigns a product as the market dictates. Macromatic's products are mainly used in the HVACR, pump control, material handling, motor control, generator and lift and elevator industries, but have been used almost anywhere.

**WHY IT MATTERS:** You can't afford lost or down time. Macromatic has been providing premier relays and controls since 1975 and they understand that customer service and product delivery are just as important as the quality of your product.

**WHO WE SERVE:** Macromatic serves OEMs and industrial distributors throughout North America.
